Campaign Optimization: ROI Optimization, CPA Analysis, CPM Management, CTR Improvement, Audience Targeting, Ad Tag Implementation

Data & Analytics: Google Analytics, GA4, Looker Studio, Kibana, Performance Metrics, KPI Tracking

Tools & Technical: Salesforce, Jira, HTML, CSS, JavaScript, MySQL, API Integration, QA & Troubleshooting

PROFESSIONAL EXPERIENCE

AIRFIND | Jun 2022 – Present | Remote (Florida, US)

Publisher Solution Specialist

Products: Yahoo Search Ads, Google CSE, Yahoo D2S/N2S, Google RSOC, Google Rewarded Web, Bing Native Display

- Implemented and managed these search monetization products across the publisher network, contributing to a 30% revenue increase.
- Onboarded publishers onto these ad products and resolved implementation issues on their end.
- Improved click-through rates (CTR) by 25% through targeted ad placements and creative improvements.
- Rolled out new ad formats and monetization strategies that lifted CTR by another 10%.
- Resolved 1,000+ deployment and support tickets across Airfind's Client Deploy and Publisher Support queues.
- Built and submitted websites for Google AdSense and Google Ad Manager approval, then tracked campaign performance across both platforms alongside GA4.
- Ran performance analysis using Kibana, an internal performance dashboard and Looker Studio to guide ongoing optimization.
- Implemented tracking pixels for TikTok, Facebook and GDN, along with postbacks through ClickFlare and standard postback setups.
- Implemented IP click and user click limiting that cut fraudulent activity by 15%.
- Trained clients and internal teams on ad analytics and KPIs, reaching a 99% client satisfaction rate.

TABOOLA INDIA PRIVATE LIMITED | Mar 2019 – Jun 2022 | Gurgaon, India

Senior Implementation Representative (Dec 2021 – Jun 2022) | **Implementation Representative (Mar 2019 – Dec 2021)**

Products: Feeds, Widgets, Read More, Explore More, Video, Footer Overlays, Next Up

- Analyzed team KPIs on a weekly, monthly and quarterly basis, digging into root causes and driving fixes when metrics fell short of target.
- Coordinated with Account Managers on status updates and led client progress meetings across regions to resolve technical challenges.
- Delivered training sessions for the team on new product launches and recurring product issues.
- Led daily board management and shift coordination for the implementation team.

- Owned the end-to-end implementation lifecycle for these Taboola ad products, from ticket intake through QA and live publishing.
- Used JavaScript and SQL to map product issues and organic content, keeping live feeds and widgets accurate.
- Delivered 100+ third-party integrations single-handedly in a month, supporting publishers across EMEA, APAC, US and LATAM.
- Built CSS-based layout changes on live feeds and widgets to match customer requirements, contributing to a 99% customer satisfaction rate.
- Tracked implementation requests and technical issues daily in Salesforce and JIRA.

VERIFACTS SERVICES PVT. LTD. | Nov 2018 – Feb 2019 | Gurgaon, India

Client Account Manager

- Managed background verification processes for 3–4 clients from initiation through final report generation.
- Coordinated with clients and internal stakeholders throughout the verification process to keep cases on track.

AUTHBRIDGE | Mar 2017 – Oct 2018 | Gurgaon, India

Process Specialist

- Quality-checked background verification work completed by other departments before it reached the client.
- Compiled and emailed final verification reports to clients.

KEY PROJECTS

Yahoo Search Ads QA (Airfind): Quality-checked Yahoo Search Ads implementations against Yahoo's official checklists across 50+ client accounts.

Mission America: Urgent implementation support that reduced escalations and improved CSAT and resolution time.

Newsletter Organic Mapping (SME): Mapped organic content via metadata and X-path rules; led migration of tickets from JIRA to Salesforce.

ABP Testing: Built and QA'd ABP widgets and feeds across the publisher base, leading the initiative end to end.

Onboarding Process: Contributed to onboarding documentation and trained new joiners, tracking ramp-up timelines.

Guru Cards: Created knowledge cards to cut repeat queries, then tracked usage and time saved.

Request Acknowledgement Improvement: Built a standard acknowledgement template and trained the team on it.

Client to Support (C2S): Coordinated direct implementation and support for low-revenue publisher accounts.

Team Knowledge Pages: Built knowledge base pages used globally across teams.
